- (C) Notify those in charge of medical files for affected employees
- (D) All of the above

6. Which of the following must be tested FIRST before an employee enters a confined space?

- (A) Oxygen content
- (B) Flammable gases and vapors
- (C) Potential toxic air contaminants

7. What does the acronym IDLH stand for with respect to confined spaces?

- (A) Instant Death Lurks Here
- (B) Immediately Dangerous to Life or Health
- (C) Integrated and Differentiated Level of Hazards
- (D) Inflammability Detection Level Hazard

8. Atmospheres that contain a flammable component above what percent of its Lower Explosive Limit (LEL) are considered hazardous for confined space entry?

- (A) 10 percent
- (B) 7.5 percent
- (C) 5 percent
- (D) 2.5 percent

9. When you see this sign with the word DANGER and this image you should understand that:

- (A) There's a man hiding in a cardboard box and he's coming to get you
- (B) You are entering an area with confined space
- (C) This is an entry to air duct. Air pressure may suck you further inside
- (D) None of the above

10. OSHA mandates that an Entry Supervisor sign the Entry Permit before an employee begins work in a confined space.

- (A) True
- (B) False

11. An attendant can enter a permit space to help the employee inside the confined space without being relieved by another authorized attendant.

- (A) True
- (B) False

12. The retrieval line attached to the chest or full body harness worn by authorized entrants should be attached to:

- (A) Both their shoulder (B) Their hips
- (C) The center of their backs near shoulder level or above their heads
- (D) Arms and legs
